STATEMENT

Dual Use

This statement is about positioners and switch boxes including all internal parts and components.

Dual-use regulations govern the export, transfer, brokering, and technical assistance of items that can be used for both civilian and military purposes, often referred to as dual-use items. These regulations aim to prevent the proliferation of weapons of mass destruction and other destabilizing military applications.

All our products have been reviewed based on:

- 2021 EU Regulation 2021/821: Items listed in Annex I
- Council Regulation (EU) 2022/328 of 25 February 2022 Annex VII

and the result is that none of our products, components and parts fall under the classification for Dual use.
